

Client experience overall care	
Description	How clients rated their overall home care experience
Survey question	<p>OVERALL, how would you rate the quality of your home care services (including both professional and personal services), where 0 is the worst and 10 is the best?</p> <ul style="list-style-type: none"> ▪ 0 (worst) ▪ 1 ▪ 2 ▪ 3 ▪ 4 ▪ 5 ▪ 6 ▪ 7 ▪ 8 ▪ 9 ▪ 10 (best)
Data Source	2019 HQCA Alberta Seniors Home Care Client Experience Survey
Calculation	<p>Results are reported as the percentage of all valid responses, for each of the response options, as described above.</p> <p>For example, percentage reporting “10” =</p> $\left(\frac{\text{Number of respondents stating "10"}}{\text{Total number of valid responses}} \right) \times 100$
Assumptions	None.
Exclusions	<p>Eligible respondents include long term supportive and maintenance home care clients that were receiving services during the period of April to June 2018. General exclusion criteria for the HQCA Alberta Seniors Home Care Client Experience Survey include:</p> <ul style="list-style-type: none"> ▪ Clients that received home care services in long term care, designated supportive living, or hospice ▪ Clients with a cognitive performance scale score greater than 2 (moderate to severe impairment) ▪ Clients younger than 65 years of age as of September 30, 2018 ▪ Clients receiving less than one visit per week ▪ Client with an invalid mailing address.

Limitations	<p>Survey results from the ASHCCES are generalizable only for long term and maintenance home care clients 65 years of age and older with no cognitive impairment. Findings from this survey do not represent the perspectives and experiences of other home care client types or long term and maintenance home care clients that are younger than 65 years of age.</p> <p>Also, clients were not always able to complete the survey on their own due to cognitive or physical ability, with completion of the survey sometimes requiring family involvement. Thus, the results may include elements of both client and family reported experience. Also, some home care clients may have had difficulty differentiating between the services provided by home care and services provided by a site.</p>
